## Canadian Rocker Releases Soulful New EP, Already Getting Airplay Across the U.S.

**OTTAWA, ONTARIO** --- Sal Piamonte catapulted back into the music scene today with the release of his new EP – *Rogue*. The soulful southern rock CD is already getting airplay on FM stations across the United States, including rock stations in Florida, New York, Texas, Idaho, Oregon and New Mexico – and is quickly gaining momentum.

With songs like *Humble Heart*, *Friends Don't Come Around*, and *Moments They Pass*, Sal Piamonte has earned himself significant recognition from *Billboard Magazine* and at the preeminent annual music festival *South by Southwest*.

Sal has also made a name for himself in the arena of soundtracks. Discovery Channel's Animal Planet boasted record ratings when they recently showcased clips from two of Sal's new songs for their worldwide broadcast of *Tiger Week*, featuring their hottest new star – and one of *Cosmopolitan Magazine's Fun and Fearless Males of 2008* – Dave Salmoni.

**Two-time Grammy Award winner Ted Greenberg (*Standing in the Shadows of Motown*) mixed and mastered three of the five tracks on *Rogue*, blending his legendary talent with Sal's phenomenal songwriting. The EP was produced by Kirk Ellard (Everlea) – a work that is infectious from the first note to the last.**

"Sal Piamonte writes, sings, performs and looks like a *rock star*," Greenberg exclaims. "I have had the honor to discover that this is *NO* act or trick of the light."

**World-renowned guitarist Michael "Fish" Herring, famous for his work with Prince, Christina Aguilera, Tupac Shakur, Mariah Carey, LeAnn Rimes and Anastacia, so impressed with Sal's music, requested to perform with Sal on a special bonus track, as well as Sal's live west coast shows.**

"Sal is the real deal," Herring says of his fellow musician. "He's a true artist who knows how to bring emotion, dynamics and vision together in his music to create an honest, soulful sound. Sal's bluesy blend of rock is timeless – a modern classic."
